### Introduction to Probability: Problem Solutions

Solution to Problem 117 (a) Figure 11 provides a sequential description for the three different strategies Here we assume 1 point for a win, 0 for a loss, and 1/2 point for a draw In the case of a tied 1-1 score, we go to sudden death in the next game, and Boris wins the match (probability  $p w$ ), or loses the match (probability  $1 - p w$ )

### **Introduction to Probability 2nd Edition Problem Solutions**

Solution to Problem 18 Let  $p_i$  be the probability of winning against the opponent played in the  $i$ th turn Then, you will win the tournament if you win against the 2nd player (probability  $p_2$ ) and also you win against at least one of the two other players [probability  $p_1 + (1 - p_1)p_3 = p_1 + p_3 - p_1p_3$ ] Thus, the probability of winning the
